Website Enhancements

User Accessibility Controls & ADA Compliance

Inclusivity for everyone. Attract new customers. Comply with legislation.

We live our lives online. It's where we read the news, order groceries, and connect with people, but 20% of the population has disabilities that exclude them from using it. Everyone should be able to enjoy your website, regardless of ability. This website enhancement streamlines accessibility, allowing businesses of all sizes to take an inclusive approach for their users and comply with ADA & WCAG.

\$490/Year + \$140 Installation Fee

Optimal Image Compression & Delivery

Images add up to 60% of the average web page's total load time. For that reason, by taking care of something as simple as optimizing them, you can get your site to load up to twice as fast.

This enhancement decreases page load times and helps deliver your images quicker using a fast image CDN. Process your uploaded images and optimize them automatically across all devices. Visitors will see images that have been tailor-optimized to fit their specific screen – for better performance and experience.
